Test Case and Bug

Hubungan Test Case dan Bug

Test Case Life Cycle

Test team plan to execute 5 test cases

1. Test case 001: tester found bug in it.

2. Test case 002: tester can finished the test case. The result is the test case pass the test.

3. Test case 003: Because of the bug in test case 001 and the test cases is related to the test case 001, so they can not perform test case 003.

4. Test case 004: when the tester is about to do the test, it turns out that the tool is not ready. So, the tester decide no to perform the test case 004.

5. Test case 005: test case 005 need a lot of time to execute because it has to run in different operating system. So, tester is still running test case 005.

Test Case Report

Test Case	Skip	Pass	Fail	Queue	In Progress	Block	Plan Hours	Actual Hours	%Effort
001	0	1	0	0	0	0	1	1,5	66%
002	0	0	1	0	0	0	2	2	100%

$$Effort = \frac{Plan\ Hours}{Actual\ Hours} \times 100\%$$
